SWOT Analysis Components

•Strengths (Internal, Positive): Capabilities, resources, and advantages within your control (e.g., strong brand, loyal customers, proprietary technology).

• Weaknesses (Internal, Negative): Internal limitations or areas needing improvement (e.g., limited budget, outdated technology, high staff turnover).

• Opportunities (External, Positive): External market factors that can be exploited for growth (e.g., market trends, new technologies, shifting regulations).

• Threats (External, Negative): External factors that could harm the business (e.g., competitors, economic downturns, changing consumer preferences).

1. Identifying the Target Audience

•Demographics: Age, gender, income level, education, and location.

•Psychographics: Attitudes, values, interests, and motivations.

•Behavioral Data: Buying patterns, usage frequency, and brand loyalty.

•Methodology: Surveys, interviews, focus groups, and analysis of existing customer CRM data.

•Tools: HubSpot segmentation, surveys (e.g., SurveyMonkey).

2. Competitor Analysis

•Identify Competitors: Direct (similar products) and indirect (alternative solutions) competitors

2. Competitor Analysis

•Identify Competitors: Direct (similar products) and indirect (alternative solutions) competitors.

•Analyze Performance: Use tools like SEMrush or Ahrefs to check website traffic, social media presence, and SEO keywords.
